## 2.33% accrual rate benefit

Use these tables to calculate the required remittances for OMERS members who have the Supplemental Plan coverage for the 2.33% accrual rate benefit. For the “best three” earnings, “best four” earnings and 80 and 85 Factor Supplemental Plan benefits, use the appropriate contribution tables.

Notes:

- Supplemental Plan contributions are in addition to contributions required for the Primary Plan.
- The Supplemental Plan contribution rate is the same for contributory earnings above and below the YMPE.
- These tables are reference tables to use to look up member contribution amounts. For detailed information on how to calculate Supplemental Plan contributions, including the definition of Primary Plan rebound rate and maximum RPP limit, please refer to the OMERS Employer Administration Manual.

---

### Maximum RPP limit

The Supplemental Plan and the Primary Plan rebound contribution rate changes to 0% if the member’s contributory earnings exceed the maximum Registered Pension Plan (RPP) earnings limit (**\$140,652.00** annually for 2010). This is because the Supplemental Plan does not have a Retirement Compensation Arrangement to provide pension benefits for those members with earnings exceeding the ITA limit.

- If the member’s regular pay in a pay period exceeds the limit, do not deduct Supplemental Plan and Primary Plan rebound contributions.  
(Note: The 0% rate applies to **all** contributory earnings, not just the earnings above the limit.)
- If the member’s regular pay for the year changes to exceed the limit, discontinue Supplemental Plan and Primary Plan rebound contributions at that point.  
(Note: The 0% rate applies to **all** contributory earnings in the pay period, not just the earnings above the limit.)

Per pay period the prorated maximum RPP earnings limit is:

52 weekly pay periods	\$2,704.85
26 biweekly pay periods	\$5,409.69
22 biweekly pay periods	\$6,393.27
24 bimonthly pay periods	\$5,860.50
12 monthly pay periods	\$11,721.00
1 annual pay period	\$140,652.00
