2010 Pension Adjustments (PAs)

A pension adjustment (PA) is a deemed Canada Revenue Agency (CRA) value of the benefit a pension plan member accrues during the year. A member's PA in a year reduces the maximum amount they can deduct for RRSP contributions for the next year.

All employers who participate in a registered pension plan must calculate a PA for each plan member (this includes covered elected officials and councillors). This guide describes what a PA is and what its components are, and how to calculate PA amounts for different scenarios for a member in OMERS Primary Plan.

The OMERS 2010 PA Calculator can be downloaded from our website. It is a Microsoft Excel spreadsheet programmed to calculate OMERS PAs. Simply enter the member's 2010 Primary Plan credited service and contributory earnings, and you will get the PA.

You can also use the PA tables at the back of this booklet to calculate PAs.

- Use the one-month table for members with any amount of Primary Plan credited service.
- Use the 12-month table only for members who have 12.00 months of Primary Plan credited service.

The instructions and tables in this booklet are for OMERS Primary Pension Plan. Instructions on how to calculate a PA for a member with the 2.33% Supplemental Plan benefit are available online in the **OMERS Employer Administration Manual**.

Notes and changes for 2010

2010 figures

The following figures are for 2010 PA calculations.

- 2010 Year's Maximum Pensionable Earnings (YMPE): \$47,200
- 2010 benefit entitlement (BE) maximum: \$2,494.44
- 2010 maximum pension adjustment (PA): \$21,850
- 2010 maximum registered pension plan (RPP) earnings used for the PA: \$140,652
- The 2010 RRSP new contribution room limit is \$22,000 per year.
Beginning in 2011, the RRSP limit will be indexed to the average industrial wage (AIW).

Maximum pension

The maximum pension limit does not affect the PA calculation method. Calculate the PA using a member's actual contributory earnings (see example 9, page 11).

School boards

OMERS and the Ontario Teachers' Pension Plan calculate credited service differently. Be sure to use the OMERS method when calculating PAs for OMERS members.

Important!

Be sure to advise your payroll department or payroll provider of changes in the PA calculation.

Calculating pension adjustments (PAs)

Step 1: Using the OMERS benefit entitlement formula, calculate the BE.

Step 2: Calculate the pension adjustment using the PA formula.

Step 1: Benefit entitlement (BE)

The OMERS benefit entitlement formula approximates the amount of lifetime pension earned by the member during the year.

$$\text{BE} = 1.325\% \times \text{Contributory earnings up to the YMPE} + 2\% \times \text{Contributory earnings over the YMPE}$$

OMERS BE formula

* 1.325% of earnings up to the YMPE, plus 2% of earnings over the YMPE reflects the OMERS benefit formula, which is integrated with the Canada Pension Plan (CPP).

An OMERS member has 12 months of credited service and contributory earnings of \$50,000 in 2010. The YMPE for 2010 is \$47,200.

	Year	Calculation
BE	2010	$(1.325\% \times \$47,200) + [2\% \times (\$50,000 - \$47,200)] = \681.40

The BE of \$681.40 will be used to calculate the PA.

Example 1
Benefit entitlement calculation (earnings above the YMPE)

An OMERS member has 12 months of credited service and contributory earnings of \$20,000 in 2010 (less than the YMPE of \$47,200).

	Year	Calculation
BE	2010	$1.325\% \times \$20,000 = \265

Because the member's contributory earnings are less than the YMPE, use only the first part of the BE equation. Therefore, the BE of \$265 will be used to calculate the PA.

Example 2
Benefit entitlement calculation (earnings below the YMPE)

Note: All dollar amounts are displayed to two decimal places, except PAs which are rounded to the nearest dollar.

Maximum benefit entitlement

The 2010 maximum BE for PA purposes is \$2,494.44, even if the member earns a pension benefit greater than this amount.

Step 2: Pension adjustment (PA)

Once you have calculated the BE, calculate the PA.

$$PA = 9 \times \text{Benefit entitlement (BE)} - \$600$$

An OMERS member has contributory earnings of \$50,000 in 2010.
The 2010 YMPE is \$47,200.

	Year	Calculation
BE	2010	$(1.325\% \times \$47,200) + [2\% \times (\$50,000 - \$47,200)] = \681.40
PA	2010	$(9 \times \$681.40) - \$600 = \$5,532$ (rounded to the nearest dollar)

If the member's PA exceeds the PA maximum (\$21,850 for 2010), report the maximum PA on the member's T4.

The PA is always rounded to the nearest dollar. If the calculation result is a negative number, the PA is zero (0).

Example 3
PA calculation
(earnings above
the YMPE)

Special situations

Situations requiring special handling

Special rules apply if a member does not earn 12.00 months of credited service in a calendar year. Report a PA for less than 12.00 months of credited service if, in the year, a member:

- is hired after January 1, 2010
- is an other-than-continuous full-time (OTCFT) employee (includes 10-month employees)
- retires, terminates, or is laid off
- does not purchase a disability elimination period that occurred during the year
- is on disability waiver (OMERS will calculate and report the member's PA for the disability waiver period separately)
- is on an authorized leave of absence or legal strike and elects not to purchase or is undecided about whether to purchase the leave as credited service
- is on a statutory leave as set out in the Ontario *Employment Standards Act (ESA)* and elects not to purchase the leave as credited service (for example, a pregnancy/parental leave or family medical leave the member elects not to purchase)
- attains 35.00 years of credited service and stops contributing for part of the year.

In addition, treat the PA differently for:

- members who died during the year
- terminated or retired members receiving retroactive pay (including carryover pay or regular performance supplements) or pay equity payments of contributory earnings.

BE and PA calculations for part years

If a member receives less than 12.00 months of credited service during a year, both the BE and the \$600 components of the PA calculation must be pro-rated for the months of credited service.

Contributory earnings must be annualized for the BE calculation.

A member has 6.58 months of credited service in 2010, and contributory earnings of \$20,000.

Note: The method you use to calculate the credited service does not affect the PA calculation.

Example 4
Pension adjustment calculation for less than 12.00 months

1. Annualize the member's contributory earnings:

Divide the member's contributory earnings by the number of months of credited service and multiply by 12.00 months.
 $(\$20,000 \div 6.58) \times 12.00 = \$36,474.16$ (annualized contributory earnings)

2. Calculate the annualized BE:

$$1.325\% \times \$36,474.16 = \$483.28$$

Since the member's contributory earnings are lower than the YMPE, use only the first part of the BE formula. See example 2 on page 2.

If the member's annualized BE exceeds the maximum BE (\$2,494.44 for 2010) at this point, carry the maximum BE into Step 4.

3. Pro-rate the BE for the actual months of credited service:

$$\text{Annualized (or maximum) BE} \times (\text{months of credited service} \div 12.00 \text{ months})$$
$$\$483.28 \times (6.58 \div 12.00) = \$265$$

4. Pro-rate \$2,494.44 (2010 maximum BE) to reflect the member's credited service:

$$\$2,494.44 \times (6.58 \div 12.00) = \$1,367.79$$

5. Calculate the PA using the pro-rated or maximum BE from steps 3 and 4 (whichever is lower) and pro-rate the \$600:

$$\begin{aligned} \text{PA} &= 9 \times \text{BE} - [\$600 \times (\text{months of credited service} \div 12.00 \text{ months})] \\ &= 9 \times \$265 - [\$600 \times (6.58 \div 12.00)] \\ &= \$2,056 \end{aligned}$$

If the member's PA exceeds the PA maximum (\$21,850 for 2010) report the maximum PA on the member's T4 and the Form 119.

Disability waiver

Calculate the PA and issue a T4 for the part of the year the member was at work and contributing to OMERS, AND for any disability elimination period purchased. (OMERS will calculate the PA and issue a T4A for the disability waiver period, including approved rehabilitative employment programs.) The elimination period is normally the time between the date a member's disability occurs and the date any OMERS disability benefit (pension or waiver) begins.

We need current information and addresses for members on disability waiver or in rehabilitation programs. Please promptly report any changes.

A member was disabled from February 1 through November 30 and purchased two months of the disability elimination period. The waiver was effective June 1.

Calculate the 2010 PA for the two months credited service	January and December
Add two months purchased elimination period	February and March
No PA is reported for the unpurchased elimination period	April and May
OMERS reports a PA for the waiver period	June 1 through November 30

Example 5
Disability elimination period and waiver of contribution

35.00 years of credited service

Once a member reaches 35.00 years (420.00 months) of credited service, they no longer accrue credited service in OMERS. Report a PA only for the service up to the date that the member reaches 420.00 months of credited service. Report a PA of "nil" on the T4s for members who have reached 35.00 years of credited service in a prior reporting year.

A member works 12 months in 2010. On April 20, 2010 the member accrues 35.00 years (420.00 months) of credited service.

For the period:

January 1 through April 20	Calculate the 2010 PA based on 3.62 months of credited service
April 21 through December 31	No contributions are made and no PA is reported
2011 and later years	A PA of "nil" is reported

Example 6
35.00 years of credited service

Leave periods

Report the PA on the member's T4 or a revised PA on an amended T4, for each year in which the leave or period of reduced pay occurs.

PAs and revised PAs are always reported for the calendar year in which the service occurs. For leaves extending over two or more years, report a PA for each year.

Broken service

The basic rule:

Do NOT include leave periods (except for statutory leaves as defined by the Ontario *Employment Standards Act [ESA]*, for example, a pregnancy/parental leave) in the PA unless the member elects to buy all or part of the leave.

The details:

If a member elects to buy the leave:	PA reporting:
On or before April 30 of the year following the year in which the leave ends (CRA deadline).	Include the leave in the member's PA. If the member's T4 is already issued, recalculate the PA and re-issue the T4 with the revised PA. If your Form 119 is submitted, notify us in writing of the revised PA.
After April 30 of the year following the year in which the leave ends.	OMERS will apply to CRA for a past service pension adjustment (PSPA).

Important!

If the member elects to buy the leave before the CRA deadline, but does not pay for it by OMERS purchase deadline (December 31 of the year following the year in which the leave ends), the PA reported for each affected year will stand, even though the member doesn't acquire the service.

Statutory leaves

Statutory leaves as set out by ESA include the following types of leaves:

- pregnancy/parental
- emergency and family medical
- period of postponement (reservist leave)*
- organ donor.

The basic rule:

Assume the member will purchase the leave period and include it in the PA unless the member elects, in writing, NOT to purchase it.

The details:

If a member elects not to buy a leave period after you have submitted the T4 to CRA, the PAs cannot be revised. The PA reported for each affected year will stand, even though the member doesn't acquire the service.

* Only the period of postponement following a reservist leave, not the reservist leave itself.

If a member initially elects not to purchase a leave period and subsequently elects to purchase it:

- on or before April 30 of the year following the year in which the leave ends, include the leave in the member's PA:
 - If the member's T4 is already issued, recalculate the PA and re-issue the T4 with the revised PA.
 - If your Form 119 is submitted, notify us in writing of the revised PA.
- after April 30 of the year following the year in which the leave ends, OMERS will report a past service pension adjustment (PSPA) to CRA for approval.

Prescribed compensation

The CRA requires that the PA be calculated on compensation equal to the contributory earnings the member would have received had there been no leave or period of reduced pay.

If a member who is on leave would normally have received a pay increase during the period, the earnings on which the PA is calculated must include the increase. This is the member's "prescribed compensation."

Maximum leave allowance for PA purposes

Once a member reaches the maximum leave allowance for PA purposes, the PA process no longer applies. Leave periods beyond the maximum fall under PSPA rules, and will be handled by OMERS.

OMERS keeps track of the total leave purchased by members and will advise you when a member approaches their maximum leave allowance.

Maximum leave allowance for PA purposes	=	Five years of any authorized leave	+	An additional three years for a pregnancy and/or parental leave by either parent following the birth or adoption of a child (maximum 12 months per event)	Maximum leave allowance for PA purposes
---	---	------------------------------------	---	---	---

Disability elimination periods

A member has until the end of the year in which the elimination period occurred to purchase all or part of the period.

When a member elects to purchase all or part of a disability elimination period, the employer must pay the normal matching contributions, and the member's cost is calculated using deemed earnings. Calculate the member's PA and issue the T4 as if the purchased period were part of the regular credited service. Use the member's prescribed compensation as the earnings for the purchased period when calculating the PA.

If a member chooses not to buy the disability elimination period, calculate the PA and issue the T4 for the actual months of credited service and annualized contributory earnings for the year.

Retroactive and pay equity payments

Note: retroactive and pay equity payment information are reported differently for OMERS and the CRA. For OMERS, please follow the reporting guidelines in the *Annual reporting of membership information (Form 119)* reference materials. When a member receives a retroactive or pay equity payment of contributory earnings, recalculate the PA to reflect the additional earnings.

Add the contributory earnings for the retroactive payment to the member's regular contributory earnings for the year in which the payment is received and calculate the PA. Do not allocate retroactive payments to past years (as you would for the OMERS Form 119). Report the PA on the member's T4, even if the member retired or terminated during the year.

If a member has retired or terminated, recalculate the PA including the retroactive contributory earnings for the last year for which you calculated a PA. (Do not allocate a retroactive or pay equity payment to past years.) Subtract the original PA from the recalculated PA. Report the difference between the two PAs on a T4 in the year the payment was received.

If the member retired in 2000 or later, use 1.325% in the BE calculation.

If the member retired in 1999 or earlier, please contact OMERS Client Services.

Reminder
Report the change in earnings and PA on the Form 119

Example: A 1999 PA of \$1,506 was calculated on contributory earnings of \$18,000 for a member who retired on December 31, 1999. In 2008 the member contributes to OMERS on a retroactive payment of \$3,000. Recalculate the 1999 PA using the appropriate 1999 figures, as follows:

$\text{BE} = 1.3\% \times (\$18,000 + \$3,000)$	$= \$273$
$\text{PA} = 9 \times \$273 - \600^*	$= \$1,857 \text{ (rounded to the nearest dollar)}$

Subtract the original PA of \$1,506 from the new PA of \$1,857 and report the difference, \$351, as the PA on a 2008 T4.

* The offset in the PA formula changed from \$1,000 to \$600 as of January 1, 1997. For a member who retired before 1997, use a \$1,000 offset in the PA formula.

Example 7
PA for post-retirement retroactive pay

A retroactive or pay equity payment does not always affect a member's benefit entitlement. The BE and PA are not recalculated if a PA would not normally be calculated. For example:

- the member is already at the maximum BE for the year in which the pay is to be included; or
- the member has accrued 35.00 years of service and the last PA reported was \$0.

If a member has a leave period or disability waiver during a year in which a PA must be calculated for a retroactive or pay equity payment, special rules apply. Please contact OMERS for assistance.

Carryover pay, payroll timing and regular performance supplements

If a member terminates employment one year and receives their last pay in the following year, treat the carryover pay like a retroactive payment.

The following applies to a performance supplement only when it is your policy to attribute the payment of the supplement to the previous year.

Step 1: Calculate and report the PA in the year the member terminates employment. Do not include the carryover pay in the calculation.

Step 2: In the following year, recalculate the prior year's PA with the carryover included.

Step 3: Subtract the original PA from the new, recalculated PA. Report the difference on a T4 in the year the carryover was paid.

An OMERS member terminates employment in December 2009 and receives her last pay in January 2010.

	2010	2011
Contributory earnings	\$50,000	\$1,380 (carryover)
Credited service	12 months	0
PA reported on T4	\$5,532	see below
PA adjusted in 2010		
Contributory earnings	\$51,380	
Credited service	12 months	
PA reported on 2010 T4		\$5,781 – \$5,532 = \$249

Example 8
PA for carryover pay

Note: If a member has terminated employment, do not include any performance supplement that is, as a matter of your policy, not regularly attributed to prior years, in the PA. These earnings are reported in the year they are received and, for OMERS purposes, beyond the termination date and excluded from all OMERS reporting.

Retirement compensation arrangement

Calculate PAs for high-earning members making contributions to the retirement compensation arrangement (RCA) exactly as you would for any other member.

Members in this earnings range may reach or surpass the maximum PA limit (\$21,850 for 2010), even if their credited service is less than 12.00 months. If a member receives less than 12.00 months of credited service during a year, both the BE and the \$600 components of the PA calculation must be pro-rated for the months of credited service. Contributory earnings must be annualized for the BE calculation.

An OMERS member has 7.00 months of credited service and contributory earnings of \$150,000 in 2010. The YMPE is \$47,200.

1. Annualize the member's contributory earnings:

Divide the member's contributory earnings by the number of months of credited service and multiply by 12.00 months.

$$(\$150,000 \div 7.00) \times 12.00 = \$257,142.86 \text{ (annualized contributory earnings)}$$

2. Calculate the annualized BE:

$$\text{BE} = 1.325\% \times \$47,200 + [2\% \times (\$257,142.86 - \$47,200)] = \$4,824.26$$

Since the member's annualized BE exceeds the maximum BE (\$2,494.44 for 2010), carry the maximum BE to the next step.

3. Pro-rate \$2,494.44 (2010 maximum BE) to reflect the member's credited service:

$$\$2,494.44 \times (7.00 \div 12.00) = \$1,455.09$$

4. Calculate the PA using the pro-rated maximum BE and pro-rate the \$600:

$$\begin{aligned} \text{PA} &= 9 \times \text{BE} - [\$600 \times (\text{months of credited service} \div 12.00 \text{ months})] \\ &= 9 \times \$1,455.09 - [\$600 \times (7.00 \div 12.00)] \\ &= \$12,746 \text{ (rounded to the nearest dollar)} \end{aligned}$$

Report the PA of \$12,746 on the member's T4 and Form 119.

If the member's PA exceeds the PA maximum (\$21,850 for 2010) report the maximum PA on the member's T4.

Example 9
PA calculation
for RCA pension

Multiple T4s, jobs, or employers

Two (or more) T4s may need to be issued to an employee in one taxation year to comply with Workplace Safety and Insurance Board (WSIB) or federal regulations. For example, issue two T4s if an employee holds two separate jobs, or where a member terminates and is rehired during the year.

The CRA requires separate PAs to be reported when two T4s are issued. Calculate the PAs for the less than 12.00 months of service on each T4. The PAs added together should be close to the PA the member would have if only one PA was calculated and one T4 issued for the year.

The maximum credited service with one employer allowed in one calendar year for PA purposes is 12.00 months. If a member holding two jobs (and/or two T4s) with one employer earns more than 12.00 months of credited service in a year, please ask CRA or OMERS for assistance.

If a member works for more than one employer, each employer calculates the member's PA independently. Do not co-ordinate PAs with another employer.

Past service purchases

The *Income Tax Act* has rules, limits and processes for dealing with past service, optional service or buy-back purchases.

OMERS will calculate and report to CRA a past service pension adjustment (PSPA) for any post-1989 service credited to a member as past or optional service (including a leave period a member elects to purchase after the CRA deadline).

Report the member's election to purchase past service to OMERS on the appropriate election form. Do not revise PAs or T4s when the service is purchased as past service under CRA rules. OMERS will apply to the CRA for certification of a PSPA before the purchase can be completed and before we can include the purchased service in any benefit calculation.

A PSPA greater than zero will be subtracted from the member's RRSP room. A member purchasing post-1989 past service may need to deregister RRSP funds to create room for a PSPA before the purchase can be completed.

For a member purchasing pre-1990 service, please refer to the **OMERS Employer Administration Manual** for details.

The PA Calculator

The PA Calculator is an Excel spreadsheet. Use it to calculate PAs for both NRA 60 and NRA 65 members. Normal retirement age does not affect PA calculations.

Record the PA in Box 52 on the member's 2010 T4.

Save the PA Calculator as directed on the landing page.

Instructions

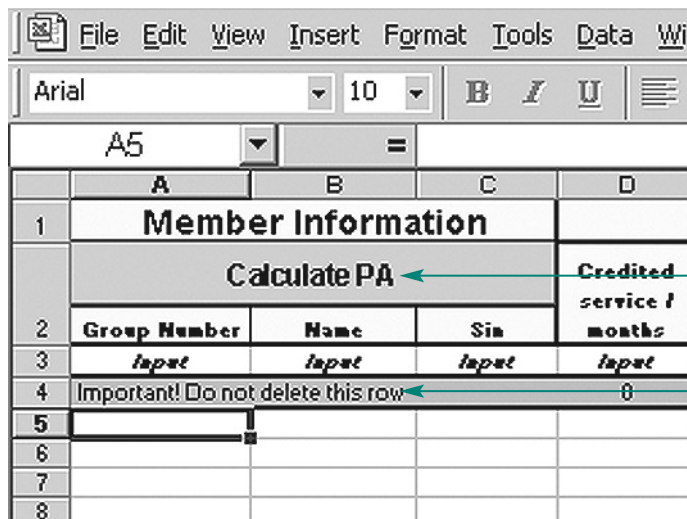

Use the member's 2010 credited service and contributory earnings.

Step 1:

Open the File.
Click Enable Macros.

Step 2:

Click Calculate PA

Do not delete this row (#4).
The PA formulas are contained
here, and the spreadsheet will
not work if these are deleted
or modified.

The following form appears.

Step 3:

Calculate PA

Group Number

Name

SIN #

Credited service/months

Contributory Earnings

PA to Report

ADD to Sheet

Exit to Sheet

Enter:

- group number (optional)
- member's name (optional)
- member's SIN (optional)
- member's 2010 credited service in months, rounded to two decimal places
- member's 2010 contributory earnings.

Click Exit to Sheet to return to the spreadsheet.

On the spreadsheet will be:

- the data you input
- the PA calculations in the order they were entered
- the numbers used in the BE and PA calculation (refer to the chart on page 16 for explanations).

The PA will appear in the PA to Report field. Round the answer to the nearest dollar. Click Add to Sheet; the information entered and the PA will be saved and recorded on the spreadsheet. Enter new data for another PA calculation.

Description of precalculated fields

Annualize	Shows whether the contributory earnings used in the BE calculation are annualized (Yes or No).
Annualized earnings	Contributory earnings used in the BE calculation (annualized when a member has less than 12.00 months of credited service).
Pension formula for 2010	The accrued OMERS pension benefit for 2010 (pro-rated for members with less than 12.00 months of credited service).
Max BE	Indicates whether the BE is over the 2010 maximum of \$2,494.44 (Yes or No).
BE	Benefit entitlement
PA offset	\$600 for members with 12.00 months of credited service (pro-rated for members with less than 12.00 months of credited service).
PA to report	The member's PA (round this amount to the nearest dollar).

The PA tables

The PA tables can be used for both normal retirement age 60 and 65 members. Normal retirement age does not affect PA calculations.

The tables use an average within the range of earnings, so compared to the PA Calculator, results may vary by about \$1.00.

Record the PA in Box 52 on the member's 2010 T4.

There is a one-month and a 12-month PA table:

- Use the one-month table for members with any amount of credited service (0.01 months to 12.00 months).
- Use the 12-month table at the end of 2010 for continuous full-time members who have 12.00 months of credited service.

Instructions for the one-month table

Use the member's 2010 credited service (Step 1) and actual monthly contributory earnings (Step 2). Identify the PA in the table corresponding to the monthly contributory earnings (Step 3). Multiply this PA by the 2010 credited service (Step 4), then round to the nearest dollar (Step 5).

A member terminates employment and membership in the plan on April 28, 2010. The member is a full-time employee who earns \$865.38 per week.

Step 1: Determine the 2010 credited service in months

= 17.00 weeks (Jan. 1 to Apr. 28) ÷ 52.00 weeks x 12.00
= 3.92 months

Calendar days, hours, pay periods or working days can also be used to calculate the credited service.

Step 2: Determine the actual monthly contributory earnings

= actual earnings ÷ months of credited service
= (17.00 x \$865.38) ÷ 3.92 months
= \$3,752.92

Step 3: Find the PA in the one-month PA table listed for the actual monthly contributory earnings

The PA listed for \$3,752.92 = \$397.49

Step 4: Multiply the PA by the 2010 credited service

= \$397.49 x 3.92 months
= \$1,558.16

Step 5: Round to the nearest dollar

= \$1,558

Example 10
Using the one-month PA
table to calculate a PA

OTCFT employees

The same method works for OTCFT employees.

If the member in Example 10 works half the time of a full-time employee, they would have 1.96 months of credited service and earn:	$\frac{\$865.38}{2} \times 17.00 \text{ weeks} = \$7,355.73$
The monthly salary rate would be:	$\$7,355.73 \div 1.96 \text{ months} = \$3,752.92$
The PA for \$3,752.92 is:	$\$397.49$
Multiply the PA by the 2010 credited service:	$\$397.49 \times 1.96 \text{ months} = \779.08
Rounded to the nearest dollar:	$\$779$

Example 11
Using the one-month PA table to calculate a PA for an OTCFT member

Maximum PA

The one-month table shows PAs calculated from \$0 to the maximum monthly salary of \$11,721.00. For employees whose monthly salary is \$11,721.00 or higher, use the monthly PA of \$1,820.83.

A member has 7.45 months of credited service and a monthly salary rate of \$13,000.	
The PA for 7.45 months of credited service	$= 7.45 \times \$1,820.83 = \$13,565.18$
Rounded to the nearest dollar	$= \$13,565$

Example 12
Using the one-month PA table to calculate PAs over the maximum

Instructions for the 12-month table

Use this table at the end of 2010 for full-time members with 12.00 months of credited service. Find the correct salary range of the actual contributory earnings and record the PA as required.
